However, more services will be introduced in coming years. Security is one of the main concerns of Mobile Commerce as it's very important to offer secure transactions and this is the reason why Mobile Commerce is still in the development phase in India.

Online Shopping In India

The Indian economy is slated to grow by upward of 6 % annually in the next few years which is among the highest rates of any big emerging economy. And quite a lot of this growth would be on the back of domestic consumption of goods and services.

E-commerce is emerging as a great level given that organized retail is still not ubiquitous across the length and breadth of the country with large retail chains making up less than 10% of the market.

E-commerce is helping people in smaller towns in India access quality products and services similar to what people in the larger cities have access to. It's being forecast that close to 60% of online shoppers would come from beyond the top eight large cities by end of this year.

Increasing internet penetration has helped to expand the potential customer pool. Internet penetration is only about 10% (or about 121 million users) as against about 81% in the US and 36% in China. However this number continues to rise at a consistent pace because of falling prices for broadband connections.

Indians are also increasingly taking to mobile devices for not only search but shopping as well. The number of Smartphone users is rapidly increasing in India and with 4G services about to take off it's expected to get even more people going online. There are currently about 950 million mobile subscribers and this number is expected to touch 1.5 billion by 2018. Of these about 270 million are estimated to be active mobile internet users. More importantly, 20% users indicated intent to buy products through their mobile phones as against the current 4% and this number is expected to only increase in the next two to three years.

20. The overall quality of teaching-learning process in your institute is very good.

4 – Strongly agree

3 – Agree

2 – Neutral

1 – Disagree

0 – Strongly disagree

21. Give three observation / suggestions to improve the overall teaching – learning experience in your institution.
